## Software Development Engineer in Test (SDET)

Test Architecture · Automation Frameworks · TypeScript · CI/CD · Quality Engineering

laise.aeduardo@gmail.com · github.com/LaiseEduardo · linkedin.com/in/laisealine

### PROFESSIONAL SUMMARY

Software Development Engineer in Test (SDET) with 14 years of experience helping engineering teams deliver high-quality software through scalable automation, modern test architecture, and engineering best practices. Specialized in TypeScript-based ecosystems, automation framework design, CI/CD integration, and quality strategies for distributed systems.

Experienced working with international remote teams, influencing engineering decisions across multiple squads, and solving complex technical challenges that improve reliability, developer experience, and delivery speed.

### ENGINEERING HIGHLIGHTS

|                                                                   |                                                                          |
|-------------------------------------------------------------------|--------------------------------------------------------------------------|
| 14 years designing and evolving quality engineering practices     | Principal / lead-level influence across teams and squads                 |
| Built automation frameworks from scratch in multiple companies    | Strong TypeScript focus across UI, API and integration testing           |
| Reduced CI pipeline cost and execution time by 40%                | Extensive experience working remotely with international teams           |
| Strong problem-solving mindset across complex distributed systems | Focused on developer experience, maintainability and delivery confidence |

### CORE EXPERTISE

|            |             |             |                   |                             |                |                     |      |
|------------|-------------|-------------|-------------------|-----------------------------|----------------|---------------------|------|
| TypeScript | Playwright  | Cypress     | Test Architecture | Automation Framework Design | CI/CD          | Contract Testing    | Pact |
| Zod        | API Testing | E2E Testing | Docker            | AWS                         | GitHub Actions | Distributed Systems |      |

### PROFESSIONAL EXPERIENCE

#### Senior QA Engineer — Abcam

Jul 2024 – Mar 2026

- Led cross-team automation initiatives, aligning frameworks, quality standards and testing practices across multiple squads.
- Implemented API automation strategies and integrated automated checks into CI pipelines to support faster delivery cycles.
- Introduced contract testing using Pact and Zod to reduce integration risk while enabling reliable service-level validation.
- Improved test reliability by isolating third-party dependencies, reducing flakiness and supporting more stable merge-request validation.
- Mentored QA engineers and developers on test strategy, automation practices, framework adoption and maintainable testing solutions.

#### Senior QA Engineer / Senior Full Stack SDET — MoonPay

Remote · May 2022 – May 2024

- Designed and maintained TypeScript-based automation frameworks across services, web applications and preview environments.
- Implemented Playwright with TypeScript from scratch and integrated it into GitHub Actions and Vercel preview deployments.
- Reduced testing pipeline cost and execution time by 40% through CI/CD optimization, better test architecture and repository improvements.
- Created GitHub Actions tooling to support dynamic preview URL capture and improve developer feedback loops.
- Worked remotely with distributed engineering teams, supporting developers and QA engineers in adopting scalable testing practices.

#### Senior SDET — Warner Media

Jul 2021 – Apr 2022

- Built and maintained a visual automation framework using Python and OpenCV for regression and compatibility testing.

- Supported quality validation across Smart TVs and set-top boxes in a complex media streaming environment.

**Senior SDET / Automation Specialist — Harlem Next**

Oct 2020 – Jun 2021

- Developed frontend and backend automation frameworks for distributed systems used across multiple countries and domains.
- Integrated CI pipelines, reporting and load testing tools while coaching teams on automation standards and testability.

**Senior SDET — DAZN**

Mar 2019 – Sep 2020

- Led test strategy for API, frontend and TV platforms in a microservices and micro-frontends architecture.
- Built automation frameworks, Docker-based pipelines and test reporting solutions to support multiplatform delivery.
- Coached engineers on automation practices, testing strategy and sustainable quality engineering processes.

**QA Engineer — LobsterInk**

Jun 2017 – Dec 2018

- Built end-to-end regression coverage using Protractor and contributed to high-impact product releases.

**QA Test Engineer — Amdocs Brazil**

Jan 2016 – Apr 2017

- Designed and executed test scenarios for backend, mobile, API and end-to-end testing in telecom migration projects.
- Collaborated with business analysts, customers and engineering teams to improve requirement coverage and validation.

**QA Analyst — Hewlett Packard Enterprise Services**

Jun 2014 – Dec 2015

- Created RTMs, test scenarios and test cases for digital banking applications, supporting manual and automated testing initiatives.

**TECHNICAL SKILLS**

**Languages:** TypeScript, JavaScript, Node.js, Python, Bash, HTML  
**Test Automation:** Playwright, Cypress, Jest, Supertest, Webdriver.io, Selenium, Protractor, Postman  
**Architecture & Quality:** Test Strategy, Test Architecture, Contract Testing, API Testing, E2E Testing, Integration Testing, RTM, Bug Lifecycle  
**Cloud & DevOps:** GitHub Actions, GitLab CI, CircleCI, Docker, AWS, GCP, Vercel  
**Collaboration:** Agile, Scrum, Kanban, JIRA, Linear, HP ALM

**EDUCATION**

**BSc Information Technology (incomplete)**  
IFSP — São Carlos, Brazil · 2013 – 2016

**LANGUAGES**

**Portuguese** — Native  
**English** — Professional Working Proficiency  
**Dutch** — Basic  
**Spanish** — Basic
